

Assessment 1 – Prompt Engineering

Find a suitable renewable energy source for Wollongong

Description

Wollongong City Council is searching for a way to generate renewable energy. You are a prompt engineer for the Wollongong City Council and they have asked you to help them in their search for alternatives. You are to critically evaluate options, meaning that your analysis should consider for instance the environment, economy, society, but also suitability given Wollongong's geographic location. Also, your analysis should include a proven case where this has worked before. Synthesise your findings in a concise manner.

Proposed approach

Create a series of prompts that guide a generative AI model through multiple related tasks to achieve a final answer. Each prompt should build on the previous one, leading the AI to gather and synthesise information step-by-step.

Deliverables (For both reports, write your full name and UOW ID at the top of first page)

Note: NO marks may be given if there is no full name and UOW id at the top of first page

1. A text submission containing one or more prompt-answer pairs with your full name and UOW id at the top of first page.

2. A report of max. 500 to 550 words with your full name and UOW id at the top of first page that explains how you came about these prompts:
- a. For each prompt, explain:
 - i. how you arrived at this prompt, and
 - ii. how it follows from the previous prompt.
 - b. For each answer, briefly reflect on why you think this answer meets the requirements or not.

Submission format

Your submission is to be uploaded via the Turnitin Submission box on Moodle.

File name must be in the form of: **TXX_NAME_UOWID.txt** where XX is your tutorial group, NAME is your full name (without space or underscore) and UOWID is your 7-digit UOW ID number (**not SIM student ID number**).

- For example, **T02_BobChew_8080426.txt**

Text submission – prompt-answer pairs

The file formats accepted for the text submission are:

- Text file (.txt)

Instructions:

- All prompt-answer pairs should be submitted in a single text submission.
- Prompts should start with an opening tag, e.g. <prompt1> and end with a closing tag, e.g. </prompt1>.
- Answers should follow their respective prompt, start with an opening tag, e.g. <answer1> and end with a closing tag, e.g. </answer1>.
- Repeat this for all prompt-answer pairs.

Example:

<prompt1>this is the first prompt</prompt1>
<answer1>this is the first answer</answer1>
<prompt2>this is the second prompt</prompt2>
<answer2>this is the second answer</answer2>
<prompt3>this is the third prompt</prompt3>
<answer3>this is the third answer</answer3>
<prompt4>this is the fourth prompt</prompt4>
<answer4>this is the fourth answer</answer4>
<prompt5>this is the fifth prompt</prompt5>
<answer5>this is the fifth answer</answer5>

Report

File name must be in the form of: **TXX_NAME_UOWID.doc** where XX is your tutorial group, NAME is your full name (without space or underscore) and UOWID is your 7-digit UOW ID number (**not SIM student ID number**).

- For example, **T02_BobChew_8080426.doc**

The file formats accepted for the report are:

- Microsoft Word (DOC and DOCX)

The report is also to be submitted via the Turnitin Submission box.

Using Generative AI

In this assessment you will be using prompts to achieve a desired output from Generative AI. You will inevitably be using Generative AI, however, there are some rules to using it ethically and responsibly.

Allowed:

- **Test your prompts:** you can use prompts to generate output based on your prompts for this exercise. Clearly document which GenAI tool you used, and how you went about testing your prompts.

Not allowed:

- **Generate prompts using Generative AI.**
- **Generate the rationale for your prompts.** You should explain how you arrived at your prompts, for example by showing their evolution and how one prompt follows another. However, you cannot use Generative AI to write this for you.

Note: NO marks may be given if there is no full name and UOW id at the top of first page
