

Assessment 2 – Generative AI business case

(Day 1 – Form a group of 5 or 6 students and select a responsible student as a group leader. The group leader of a tutorial class is to inform the lecturer of the tutorial class, group members UOW id and names before end of 8th day.)

(All team members must be present unless there is a valid reason during the interview with CTO during lab 3 and presentation during lab 4.)

Description

In this group assignment, you will explore the impact of Generative AI on various industries and develop effective strategies for incorporating Generative AI into business practices. The CTO of RetailTech Innovators has asked your group to research current applications, potential benefits, and challenges associated with Generative AI. Additionally, you will analyse how Generative AI can contribute to achieving the United Nations Sustainable Development Goals (UN SDGs) while addressing data management, privacy, and ethical considerations. You will present your findings and recommendations through a presentation and a detailed report.

Additional context

RetailTech Innovators is a large-sized online retail company. They run a website that offers a products ranging from electronics to home and kitchen appliances and health products. They have a history of applying business analytics to their business pillars like Product, Marketing, Customer Service and Office of the CEO: they mostly created dashboards to drive data-driven decision making. However,

this was only done in a few small pockets in the business, leading to many inefficiencies and duplication of systems and effort. In one case, there was even a data breach where customer service conversations were downloaded to an employee's laptop for analysis, who then got their laptop stolen.

In lab 3, you are to meet with your CTO to elicit further details about the company vision and strategy and how the company is organised. This is valuable information that will help you in building your Generative AI business case. Be aware that the CTO has very little time, so you will only be granted 20 minutes (to be shared with another group).

Deliverables

(For the report and presentation slides, write the full name of each group member and their UOW ID at the top of first page)

1. **Presentation:** A 10-minute presentation summarising your research findings and proposed strategies. This should include:
 - An overview of Generative AI and its current applications in industry.
 - Case studies or examples of successful integration of Generative AI.
 - Analysis of the impact of Generative AI on business operations and outcomes.
 - Recommendations for effectively incorporating Generative AI into business practices.
 - Discussion on how Generative AI can support specific UN SDGs.
 - Considerations for data management, privacy, and ethics in the use of Generative AI.

2. **Report:** A comprehensive report (2000 to 2200 words) detailing your research and analysis. The report should include:
- Introduction to Generative AI and its significance.
 - Detailed case studies or examples.
 - In-depth analysis of the impact on industry.
 - Strategic recommendations for integration.
 - Analysis of how Generative AI can contribute to achieving specific UN SDGs.
 - Considerations for data management, privacy, and ethics in the use of Generative AI.
 - Conclusion summarising key points and future outlook.

Submission format

File name must be in the form of: **TXX_NAME_UOWID.doc** where XX is your tutorial group, NAME is the group leader full name (without space or underscore) and UOWID is your 7-digit UOW ID number (**not SIM student ID number**).

- For example, **T02_BobChew_8080426.doc**

The report and presentation are to be submitted via the Turnitin Submission box.

**(For the report and presentation slides,
write the full name of each group member
and their UOW ID at the top of first page)**

Note: NO marks may be given if there is no full name and uow id of each group member at the top of first page

The file formats accepted for submission are:

- Microsoft Word (DOC and DOCX) for report
- Powerpoint slides (PPTX) for presentation slides

Using Generative AI

In this assessment, you will be creating a business case around Generative AI. It is assumed that you will showcase how Generative AI could be used in a business setting. You will report your findings, however, there are limits to using Generative AI to write the report.

Allowed:

- **Bootstrap your report** by prompting Generative AI to create a report structure.

Not allowed:

- **Generate parts of the report:** Our objective is to provide you with comprehensive guidance on the practical application of Generative AI and to present a compelling business case for its adoption. This assessment presents an invaluable opportunity to gain insights into the analysis and creation of Generative AI business cases within the context of industry. Acquiring this expertise will enhance your capabilities in introducing Generative AI to any business and increasing your chances of success.

Note: NO marks may be given if there is no full name and UOW id of each group member at the top of first page
