

Marking Rubric Assessment 1 – Prompt Engineering

Criteria	%	Fail	Pass	Good	Excellent
Relevance and Accuracy	20	Responses are mostly irrelevant or inaccurate.	Responses are somewhat relevant and accurate but lack depth.	Responses are relevant and accurate with minor errors.	Responses are highly relevant and accurate, demonstrating a deep understanding.
Clarity and Specificity	20	Prompts are unclear and vague, leading to confusion.	Prompts are somewhat clear but lack specificity.	Prompts are clear and specific with minor ambiguities.	Prompts are exceptionally clear and specific, leaving no room for ambiguity.
Logical Flow	20	Sequence of prompts is disjointed and lacks logical progression.	Sequence of prompts is somewhat logical but has gaps.	Sequence of prompts is logical with minor inconsistencies.	Sequence of prompts is highly logical and cohesive, building seamlessly on each other.
Vector Similarity	20	Final answer is significantly different from the expected answer.	Final answer is somewhat similar to the expected answer but lacks precision.	Final answer is similar to the expected answer with minor deviations.	Final answer closely matches the expected answer, demonstrating high precision.
Report Quality	20	Poorly written with numerous errors.	Basic writing with some errors.	Well-written with minor errors.	Exceptionally well-written, clear, and error-free.
