Acknowledgement of Country

We acknowledge that Country for Aboriginal peoples is an interconnected set of ancient and sophisticated relationships.

The University of Wollongong (UOW) spreads across many interrelated Aboriginal Countries that are bound by this sacred landscape, and intimate relationship with that landscape since creation. From Sydney to the Southern Highlands, to the South Coast. From fresh water to bitter water to salt. From city to urban to rural.

The University of Wollongong acknowledges the custodianship of the Aboriginal peoples of this place and space that has kept alive the relationships between all living things. The University acknowledges the devastating impact of colonisation on our campuses' footprint and commit ourselves to truth-telling, healing and education.

Journey Artwork by Wodi Wodi
Artist Lauren Henry.

The background is a vibrant rainbow with horizontal bands of red, orange, yellow, green, cyan, blue, and purple. Large, dark blue letters 'U', 'O', and 'W' are positioned on the right side of the image, partially cut off. The 'U' is at the top, the 'O' is in the middle, and the 'W' is at the bottom.

Everyone is welcome here.

UOW takes pride in
the diversity of our
community.

Subject introduction

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Subject Description

In this subject, students delve into the world of Generative AI. They explore the foundational principles and practical applications of this cutting-edge field. Through a blend of theory and hands-on experience, students gain insights into how Generative AI empowers artificial intelligence to create original content – ranging from text and images to video and code – based on user prompts. The curriculum covers essential topics, including AI's role in code generation, effective prompt engineering techniques, and the development of advanced generative models like GANs and Transformers. Moreover, students critically examine the ethical implications of Generative AI and its impact on businesses strategy. By the end of the subject, students will have a comprehensive understanding of this promising field and the ability to responsibly apply Generative AI in real-world scenarios.

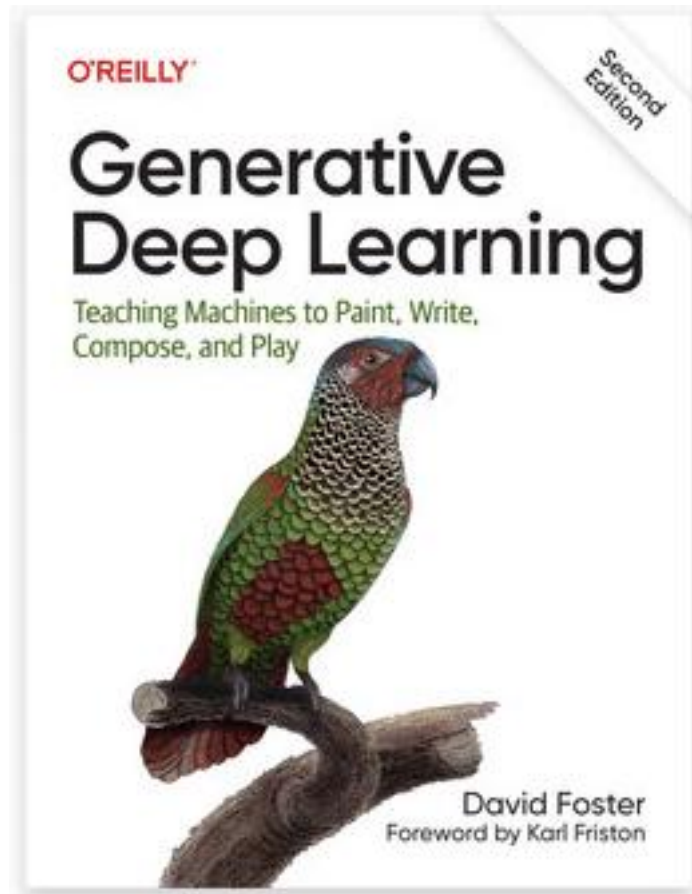

Subject Learning Outcomes (SLOs)

On successful completion of this subject, students will be able to:

1. Demonstrate an understanding of the foundations of Generative AI and its practical applications in text generation, image generation and assisted coding.
2. Apply effective prompt engineering for various tasks.
3. Demonstrate an understanding of techniques to enhance model performance, such as fine-tuning, Retrieval Augmented Generation and Reinforcement Learning using Human Feedback.
4. Identify the impact of Generative AI for industry and employ effective strategies to incorporate Generative AI.
5. Demonstrate ethical and responsible use of Generative AI.

Don't forget 

This is the book we're using

<https://www.oreilly.com/library/view/generative-deep-learning/978109813>

What did we discuss last week?

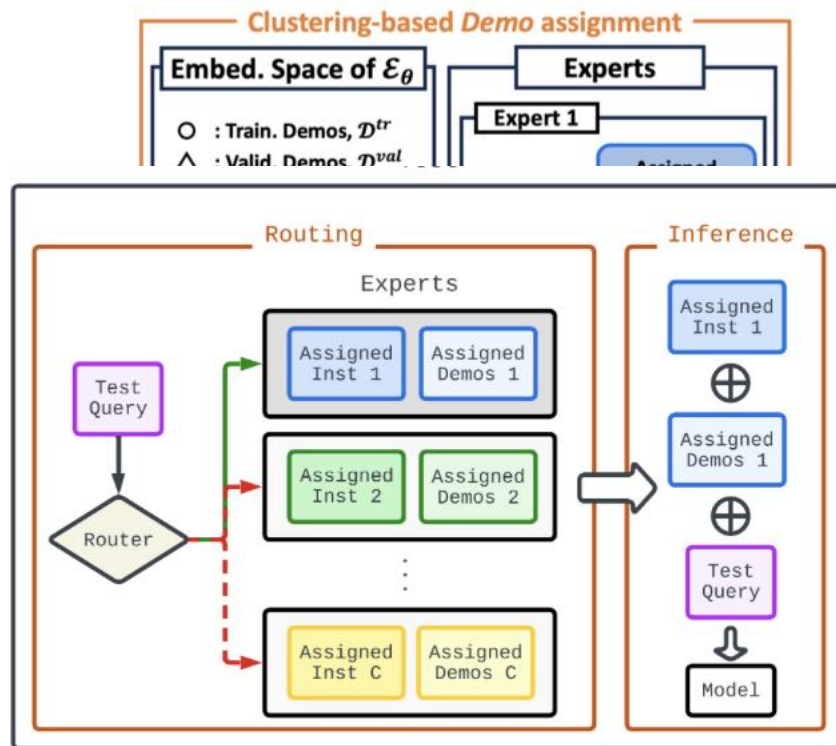

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Mixture-of-Prompts (Wang *et al.*, 2024)

Mixture-of-Experts model applied to prompts construction.

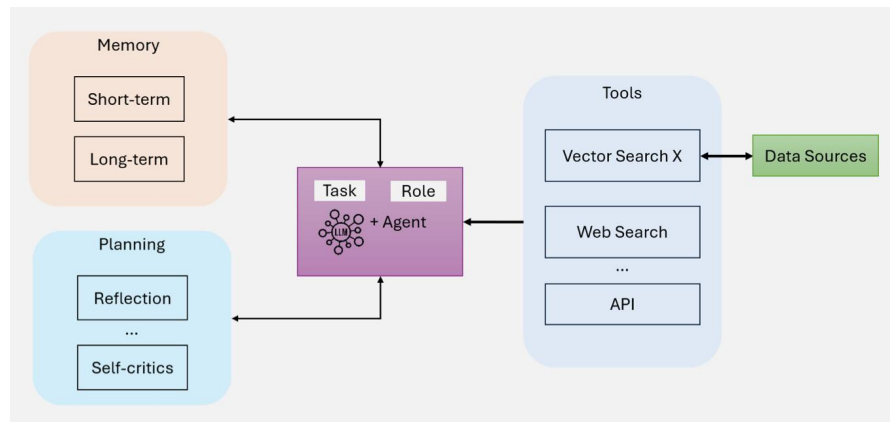

✗ Most APE techniques use one model to generate only one demo-free instruction.

- Construction of prompts requires experts to focus on parts of the problem space $\rightarrow$ classify demos into clusters and assign them to an expert.
- The router decides which expert to assign to the query.

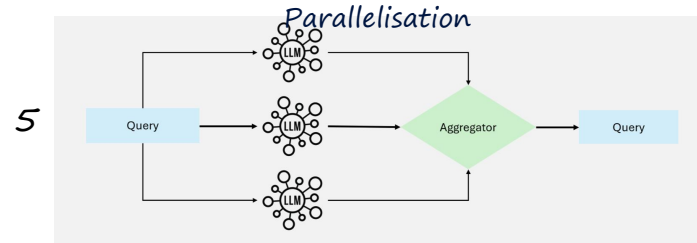

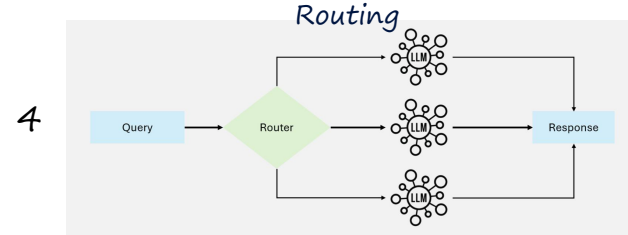

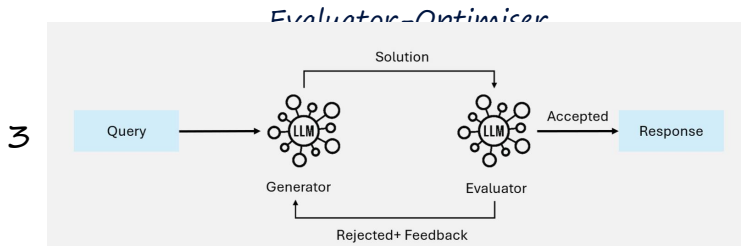

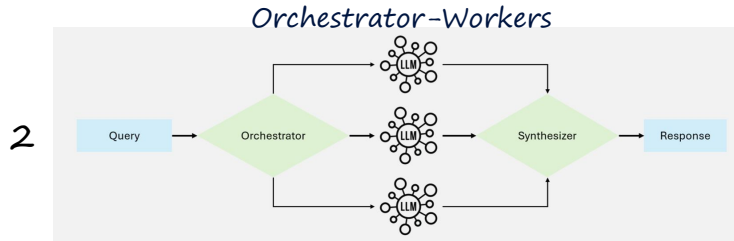

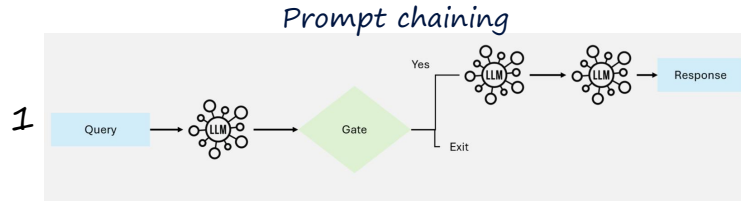

Components of an AI Agent (Singh *et al.*, 2025)

- LLM: primary reasoning engine and dialogue interface.
- Memory: stores short-term interactions and long-term knowledge.
- Planning: helps the agent reflect on, critique, and break down actions.
- Tools: capabilities that help the agent retrieve additional information

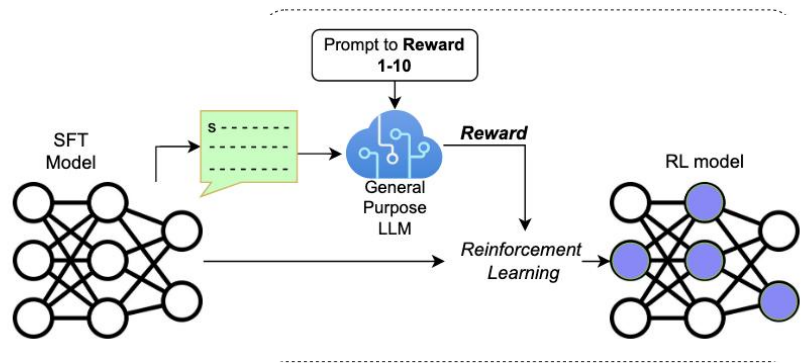

Singh *et al.*, 2025

Name the Agentic Workflow Patterns (Singh *et al.*, 2025)

Reinforcement Learning with AI Feedback (RLAIF)

- Replaces a human rater by an off-the-shelf LLM.
- Two types (Lee et al., 2024):
 - Canonical RLAIF: separate scoring and reward models
 - Direct RLAIF (d-RLAIF): only reward model

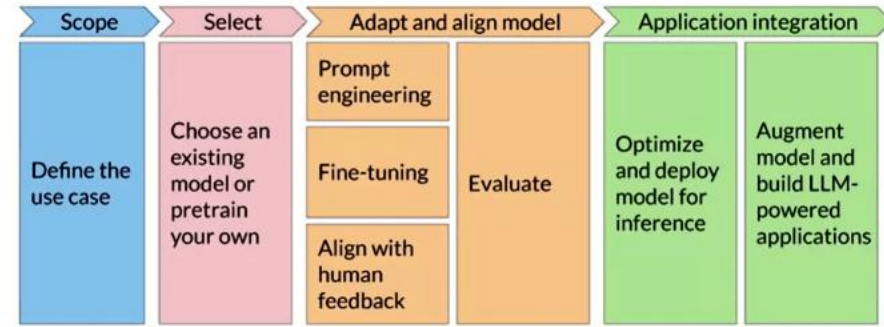

Lee et al., 2024

🧑 Equal performance to RLHF, but less time-consuming and labour-intensive.

Module 3: Business Applications and Strategy

Almost there!

- You survived the Basics of Generative AI (Module 1) and Model Enhancement (Module 2)
- This module will focus on how to create a business case for Generative AI.
- It is lighter, but not necessarily easier..

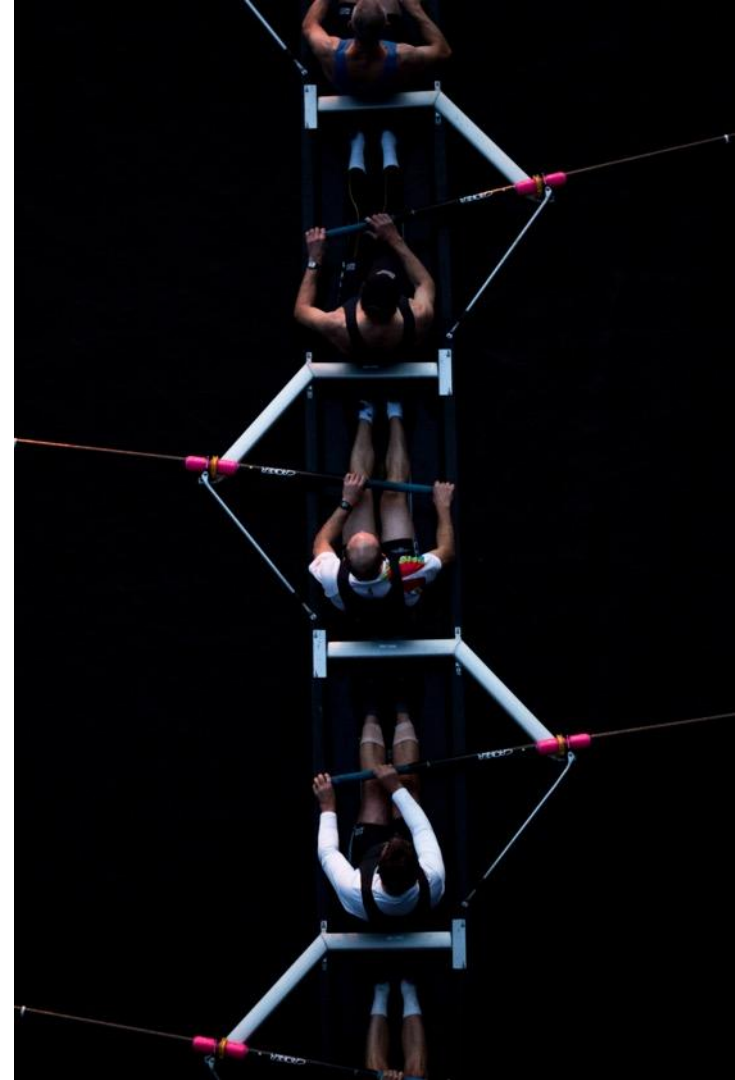

Why are we here?

CSIT205 Generative AI - Module 3

Business Vision Setting for Generative AI

- *Business Case for GenAI*
- *Elements of a GenAI Vision*

Business Case for Generative AI

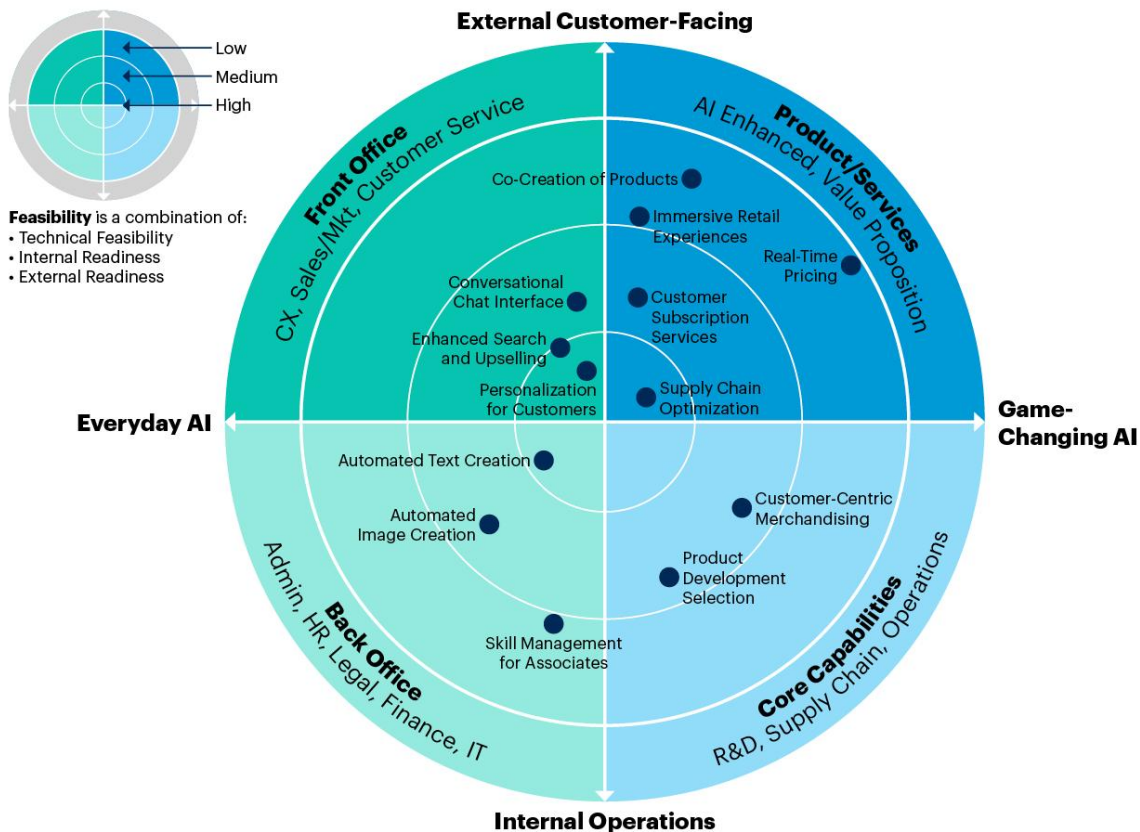

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Opportunities for Generative AI

What we've seen so far

The AI Opportunity Radar Populated With Retail Industry Use Cases

Source: Gartner
801057_C

Benefits of Generative AI

- *Increased Efficiency by automating and speeding up repetitive tasks.*
- *Improved Productivity through automation of routine tasks, which allow people to focus on more enjoyable.*
- *Enhanced Customer Experience through chatbots, sentiment analysis, etc.*
- *Increased Innovation due to GenAI's ability to quickly bootstrap new ideas.*
- *Cost Savings by reducing manual labour.*

Challenges for Generative AI

- *Data: GenAI needs vast amounts of data for training.*
- *Technological readiness: product and services may not be ready to incorporate GenAI.*
- *Computing power: GPUs may not be widely available as GenAI usage increases.*
- *Cost: GPUs cost a lot of money, so (re)training / fine-tuning can become expensive.*
- *Skills / experience: GenAI talent is scarce, which can hinder innovation.*
- *Governance: How do we stay in control with respect to safety, security, responsible AI, and ethics?*

The Case for a Business Case

- *Communication: Helps you get the message across to management.*
- *Value: Shows upfront what the potential benefit could be.*
- *Success: Increases the chances of success, because you have already explored potential hindrances and opportunities for adoption.*
- *Risk management: Ensures you have done your research, also regarding security, privacy and ethical risks.*

Value Proposition Canvas

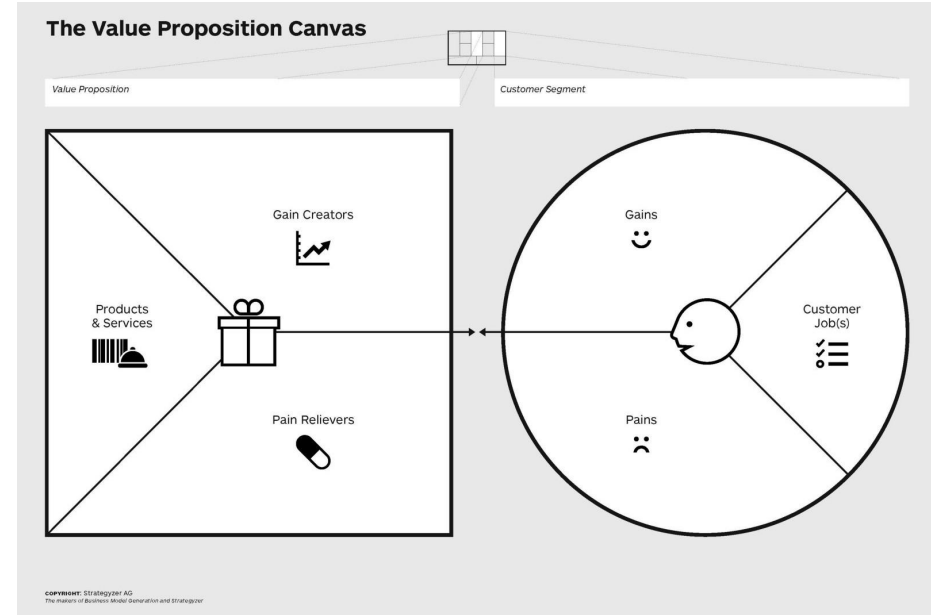

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Value Proposition Canvas

Shows how your tool can add value

- Client profile:
 - Jobs: tasks, needs
 - Pains: risks, costs, challenges, etc.
 - Gains: wishes, expectations
- Value proposition:
 - Products & Services: thing that does the job
 - Gain creators: e.g. increased productivity
 - Pain relievers: e.g. cost / time savings

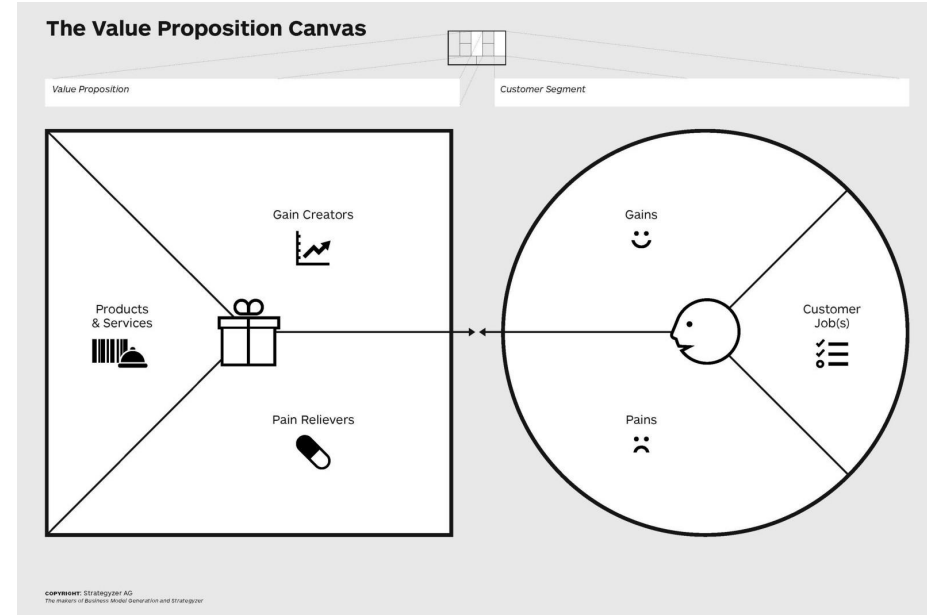

Strategyzer AG

Value Proposition Canvas Example

Shows how your tool can add value

- Client profile:
 - Job: checking incoming emails to info@company.xyz and sending them through to the correct department.
 - Pains: boring, repetitive, risk of sending sensitive information through.
 - Gains: automated suggestion on where it should go.
- Value proposition:
 - Products & Services: email classification system (i.e. text analysis).
 - Gain creators: increased productivity, motivation, efficiency.
 - Pain relievers: less risk of sending sensitive information through, time / cost savings.

Strategyzer AG

U

SCQA

O

W

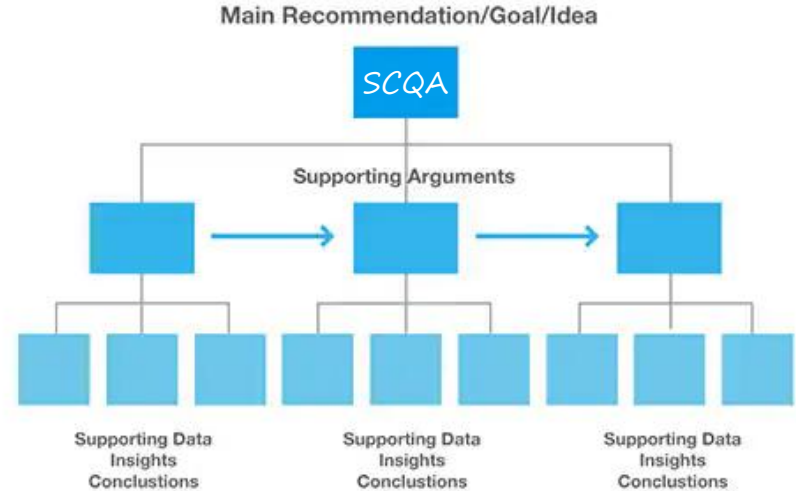

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

The SCQA method

Situation, Complication, Question, Answer

- Created by Barbara Minto (McKinsey)
- Part of the Pyramid Principle
- Excellent way to structure your argument
- Situation: What is the status quo, the current state?
- Complication: What challenges do you face?
- Question: What questions arise to address the complication?
- Answer: How you address the complication

<https://www.mckinsey.com/alumni/news-and-events/global-news/alumni-news/barbara-minto-mece-i-invented-it-so-i-get-to-say-how-to-improve-it>

SCQA Example

Situation, Complication, Question, Answer

- *Situation: UOW Library is key in enabling resources for students and staff.*
- *Complication: We've seen a surge in the use of Generative AI as a resource, resulting in instances of a) academic misconduct, and b) inequality between students.*
- *Question: How can UOW Library guide the responsible and ethical use of Generative AI?*
- *Answer: Enable Generative AI for students and staff and educate on the responsible and ethical use of GenAI.*

SCQA Example

Supporting arguments – Mutually Exclusive, Collectively Exhaustive (MECE)

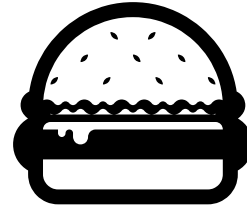

- Supporting argument 1: *Similar to other tools, UOW Library should enable GenAI*
 - Data: UOW Library website searches; questionnaires.
 - Insights: 80% of students who use references seek additional guidance from UOW Library.
- Supporting argument 2: *Students have reportedly used GenAI, but there is a lack of clarity around responsible and ethical use of GenAI*
 - Data: questionnaire
 - Insights: 82% of students have used Generative AI in their assignments, but they don't know how to attribute it to GenAI or what the exact rules are.
- Supporting argument 3: *We see an increase in academic misconduct*
 - Data: AM reports
 - Insights: there is an increase in the use of Generative AI during exams.

10-minute Break!

This will help you learn

10 minutes

Match the following concepts and descriptions related to the Value Proposition Canvas.

Tasks, needs

*Solutions that solve
customer problems*

*Solutions that customers
wish for*

Jobs

Gains

Pain relievers

Customer service chatbots are an example of an opportunity in:

A. *Front office*

B. *Products and services*

C. *Back office*

D. *Core capabilities*

Elements of a GenAI Vision

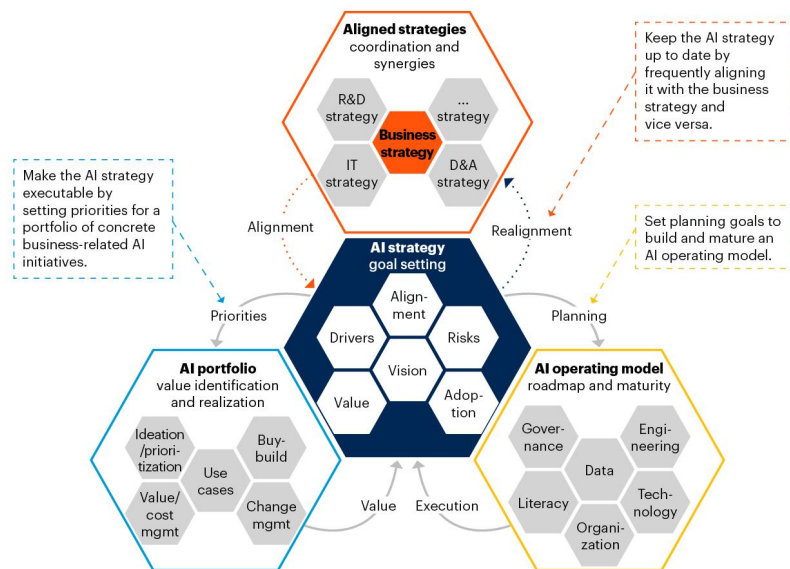

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

The Vision in Context

It is pivotal to your Strategy and is closely related to:

- *Value: What are the company's priorities and what use cases do we have?*
- *Drivers: what is driving the need / urgency for Generative AI?*
- *Alignment: a GenAI vision should follow the business vision.*
- *Risks: Can we use GenAI in an ethical, responsible manner? How do we mitigate risks?*
- *Adoption: Which capabilities do we need to ensure GenAI is adopted?*

The AI Strategy in Context

Source: Gartner
805859_C

Vision, Mission, Values

The power of three

- *You will often see the Vision in conjunction with a Mission Statement and Values*
- *A Vision often leans on three strategic pillars, but may deviate depending on the company's size and breadth of services / products.*
- *Values often come in three to six.*

You are here: [Home](#) » [About Us](#) » [Mission & Vision](#)

Mission and vision

Our mission

The Salvation Army Australia is a Christian movement dedicated to sharing the love of Jesus.

We share the love of Jesus by:

- Caring for people
- Creating faith pathways
- Building healthy communities
- Working for justice

Our vision

Wherever there is hardship or injustice, Salvos will live, love and fight, alongside others, to transform Australia one life at a time with the love of Jesus.

Our values

Recognising that God is already at work in the world, we value:

- Integrity
- Compassion
- Respect
- Diversity
- Collaboration

We commit ourselves in prayer and practice to this land of Australia and its people, seeking reconciliation, unity and equity.

Mission statement

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Mission Statement

- Why are we here? What is our purpose? What are our values?
- What do we currently do as a business? What is our product or service offering?
- Who are you doing this for?
- Examples:
 - "We're on a mission to..."
 - "Our purpose is to..."

Mission statement examples

Canva

- to empower everyone in the world to design anything and publish anywhere. Values: Be a force for good, Be a good human, Empower others.

- our purpose is to build a connected future so everyone can thrive. Values: Look Beyond, Work as One, Make a Difference

- to build a brighter future for all. We are guided by our values: Care, Courage, Commitment

Mission statement analysis

Canva

- to empower everyone in the world to design anything and publish anywhere. Values: Be a force for good, Be a good human, Empower others.
- our purpose is to build a connected future so everyone can thrive. Values: Look Beyond, Work as One, Make a Difference
- to build a brighter future for all. We are guided by our values: Care, Courage, Commitment

Good Mission, Bad Mission

Canva

- to empower everyone in the world to design anything and publish anywhere. Values: Be a force for good, Be a good human, Empower others.

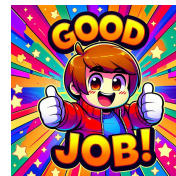

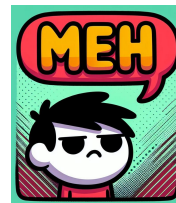

- our purpose is to build a connected future so everyone can thrive. Values: Look Beyond, Work as One, Make a Difference

- to build a brighter future for all. We are guided by our values: Care, Courage, Commitment

Good / bad?

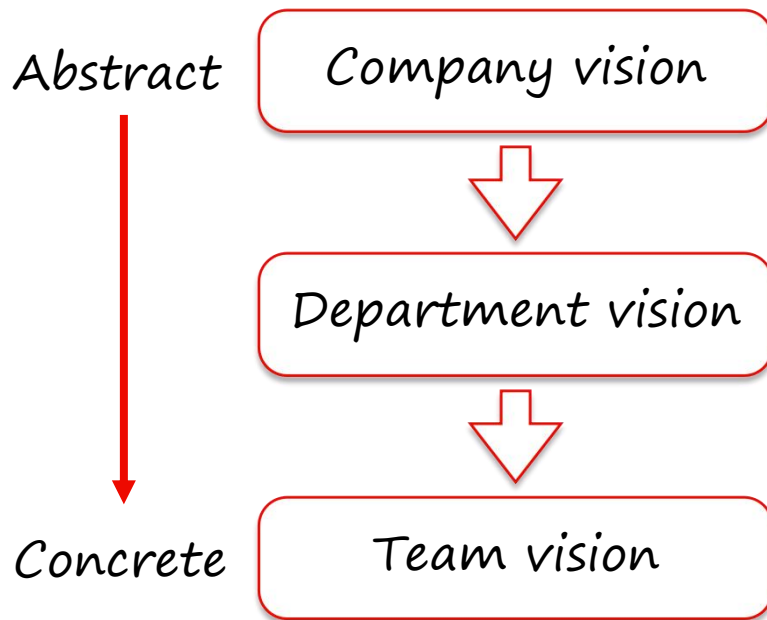

Vision statement

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Vision Statement

- Focus on the Future: Where do we want to be in 1, 2, 5, or 10 years from now?
- You can have multiple vision statements, depending on your context
 - Team-level: 1-2 years
 - Department: 2-5 years
 - Company: 5-10 years
- A vision trickles down from the top and gradually gives more meaning to a potentially abstract vision.
- Often includes 2-4 strategic pillars of focus.
- A vision ~~can~~ will change along the way!

Vision Statement examples

- Tesla: to create the most compelling car company of the 21st century by driving the world's transition to electric vehicles.

- Walt Disney Company: to be one of the world's leading producers and providers of entertainment and information.

Good Vision, Bad Vision

A good vision statement...

- *Focuses on the future*
- *Contains specific and measurable goals*
- *Inspires and motivates*
- *Is concise and clear*
- *Is unique*
- *Evokes emotions*
- *Aligns with the mission and values*

Image of a dart hitting bullseye, MS Copilot

Vision statement analysis

Tesla: to create the most compelling car company of the 21st century by driving the world's transition to electric vehicles.

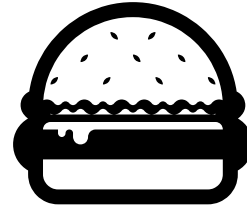

- ✓ • Focuses on the future
- ✗ • Contains specific and measurable goals
- ✓ • Inspires and motivates
- ✓ • Is concise and clear
- ✓ • Is unique
- ✓ • Evokes emotions
- ? • Aligns with the mission and values

7-minute Break!

This will help you learn

7 minutes

What is your Vision for GenAI for students at UOW?

Remember, a good vision statement...

- *Focuses on the future*
- *Contains specific and measurable goals*
- *Inspires and motivates*
- *Is concise and clear*
- *Is unique*
- *Evokes emotions*
- *Aligns with the mission and values*

Vision for GenAI for students at UOW

To empower the next generation of innovators and leaders by fuelling creativity, productivity, and positive impact with AI. By 2030, every student will be using generative AI responsibly and ethically for their daily learning tasks to create a brighter future for the community.

- ✓
 - Focuses on the future: 'By 2030'
- ✓
 - Contains specific and measurable goals: 'every student'
- ✓
 - Inspires and motivates: 'community', 'leaders'
- ?
 - Is concise and clear: we may omit the first sentence.
- ✓
 - Is unique: UOW has a specific focus on the community.
- ✓
 - Evokes emotions: 'brighter future'
- ?
 - Aligns with the mission and values: the first sentence could have been a mission statement.

True or False

This is a good Vision statement?

"Our vision is to bring joy to the world".

False

- ✗ • *Focuses on the future*
- ✗ • *Contains specific and measurable goals*
- ✓ • *Inspires and motivates*
- ✓ • *Is concise and clear*
- ✗ • *Is unique*
- ✓ • *Evokes emotions*
- ? • *Aligns with the mission and values*

Wrap-up

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Summary

- *Value Proposition Canvas and SCQA can be helpful tools to generate a business case for Generative AI.*
- *Companies are guided by a Mission, Vision and Values.*
